

The department of Physics at Syracuse University invites applications for a tenure track faculty position in Theoretical Elementary Particle Physics. The search will be directed at the tenure track Assistant Professor level but we will consider more senior candidates under exceptional circumstances. We are particularly interested in candidates with research interests in lattice gauge theory or phenomenology with application to LHC physics. Applicants should have a clear record of research accomplishments and a strong interest and ability to teach effectively at both the graduate and undergraduate levels. Syracuse University is an affirmative action/equal opportunity employer. Members of minority groups and women are especially encouraged to apply. Review of applications will begin December 1, 2011 and will continue till the position is filled.

Candidates should visit <http://www.sujobopps.com>, search for Assistant Professor/Physics, and apply electronically for job# 028319. All applications require a CV which includes both research and teaching statements, and a list of three or four professional references. If you have any additional questions please contact facultysearch@phy.syr.edu.
