

## Postdoctoral Position in Experimental Astrophysics

A postdoctoral position in experimental astrophysics is available in the group of Professor Gianfranco Vidali at Syracuse University, Syracuse, NY (USA). The candidate will work on a new project to study the formation of molecules on surfaces of interstellar dust analogues. The position begins in early 2010 and is for one year renewable for a second year. The successful candidate should hold a PhD in physics or related field and have a strong experience in ultra-high vacuum and surface science techniques. Additional experience in atomic/molecular beams and low temperature techniques is a plus. Review of materials will begin immediately and applications will be considered until the position is filled. The candidate will work on a new project to study the formation of molecules on surfaces of interstellar dust analogues. Additional experience in atomic/molecular beams and low temperature techniques is a plus. For further information about the research in Prof. Vidali's group see the Web-site <http://physics.syr.edu/astro>.

### \*\*\*\*APPLICATION INSTRUCTIONS\*\*\*\*

Qualified candidates must complete an online management application and attach the following documents:

Curriculum vitae, list of publications, a statement describing their qualifications, and the email addresses/phone numbers of three references.

Syracuse University is an affirmative action/equal opportunity employer. Members of minority groups and women are especially encouraged to apply
